SECTION A: (40 Marks)

Questions 1 to 40 carry one mark each.

1. Name the element of weather that dries our clothes.

2. State any **one** way of reducing noise made by moving parts of machines.

3. Which component of soil gives it a dark colour?

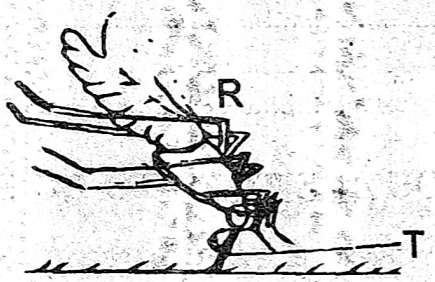

4. Name the STD that causes pus discharge in the urethra of men.

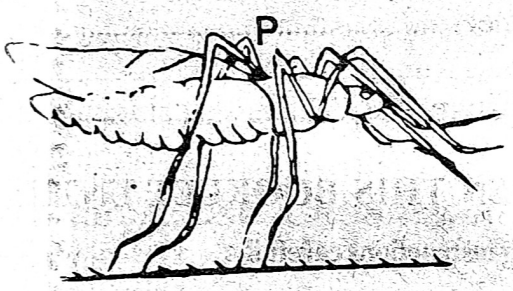

5. Apart from breathing, give other function of stomata to plants.

6. Name the accident in which splints are used.

7. Which germ causes anthrax in cattle?

The diagrams below are of common vectors. Use them to answer questions 8 and 9.

8. Identify the disease spread by the vector marked **P**.

9. Give the use of the part marked **T** to the above vectors.

10. Name the type of pulley in which the effort is applied upwards.

11. How is a swim bladder useful to fish?

12. Give **one** way in which white blood cells defend the body against diseases.

13. Which form of energy is stored in food?

14. Write **one** activity done by farmers to control external parasites.

15. Name the common fungal infection that attacks between toes and fingers.

What is the importance of stigma in flowers during pollination?

17. State the function of optic nerves in the human eyes.

18. Name the energy resource obtained from animal dung and urine.

The diagram below shows a method of harvesting wood. Use it to answer question 19.

19. Name the method of harvesting wood shown above.

20. Which injury results from the tearing of muscles in the body?

21. Write **one** characteristic of a modern bee hive.

22. What kind of magnet is used by health workers in the hospital?

23. Name the structure that mixes food with saliva in the mouth.

24. Which farm practice is done to humble male cattle?

25. Name the class of vitamins that make bones and teeth to grow stronger.

26. State **one** way a slug is similar to a grasshopper.

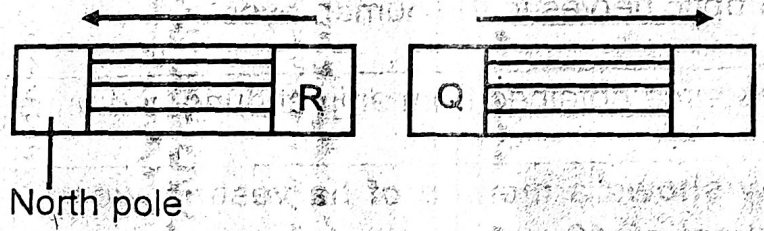

27. Why is displacement method used to measure the volume of a stone?

28. Give the fluid that reduces friction at the joint.

29. Write **one** activity done by health prefects to promote health at school.

30. Give **one** danger of wetland drainage to water animals.

The diagram below is of a property of magnets. Use it to answer questions 31 and 32.

31. Identify the property of magnets shown above.

_____

32. Name the pole marked Q.

_____

33. Give any **one** way of promoting food security in the community.

_____

34. How is the function of pulmonary vein different from that of pulmonary artery?

_____

_____

35. Name the lens that causes light rays to spread outwards.

_____

36. Give any **one** product found in the air we breathe out.

_____

37. State the importance of feeding a cow well in a milking period.

_____

38. Give **one** way carbon dioxide is useful to plants.

_____

39. Which immunisable disease can be got by drinking contaminated water?

_____

40. Give any **one** way of saving electricity at home.

_____

SECTION B (60 Marks)

Questions 41 - 55, carry four marks each.

41. (a) Apart fom covering, give other **two** ways of preventing food contamination.

(i) _____

(ii) _____

(b) How does covering of food prevent it from contamination?

_____

(c) Name **one** method of preserving food that does not involve the use of heat.

_____

42. (a) What name is given to the period when the body becomes sexually mature?

_____

(b) Give **one** primary sex characteristic that occurs in girls.

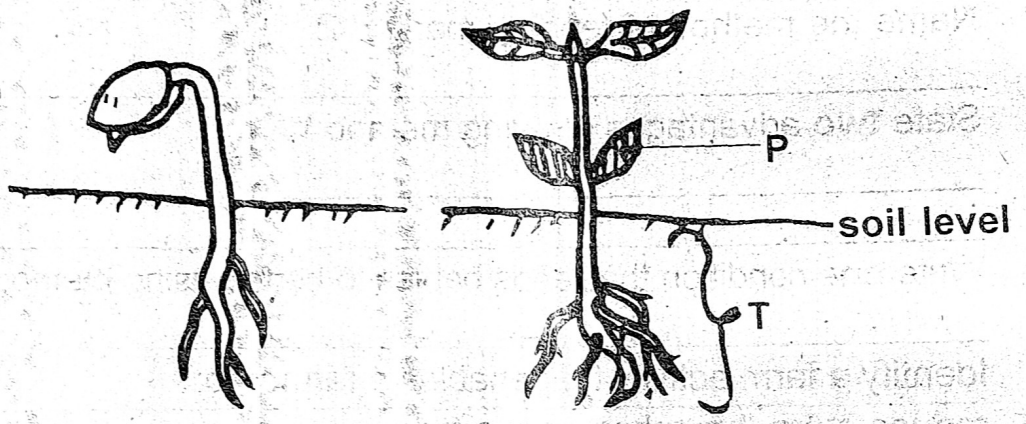

_____

(c) State the function of the following reproductive organs.

(i) Ovaries _____

(ii) Testicles _____

43. ***The diagram below is a germinating seed. Use it to answer the questions (a - d) as shown.***

(a) What type of germination is shown above?

_____

(b) Why does the cotyledon at P turn green?

_____

(c) Which part of a seed grows into the system marked T?

_____

(d) State the importance of dressing seeds before planting.

_____

44. (a) Write any **two** characteristics of images formed by plane mirrors.

(i) _____

(ii) _____

(b) Give any **one** use of plane mirrors to human beings.

_____

(c) Why does a plane mirror form regular reflection?

_____

45. (a) Give any **two** values of essential drugs to a human being.

(i) _____

(ii) _____

(b) Write **two** ways in which body poisoning with drugs can be prevented.

(i) _____

(ii) _____

46. ***The diagram below shows the method of feeding babies. Use them to answer question 46.***

W

Z

(a) Name the method of feeding marked **Z**.

(b) State **two** advantages of using method **W**.

(i)

(ii)

(c) Write **one** condition that leads babies to be fed using method **Z**.

47. (a) Identify a farm activity that enables a farmer to:

(i) reduce extra branches from a tree.

(ii) break the life cycle of pests.

(iii) control plant population.

(b) Give a reason why farmers use herbicides on their farms.

48. (a) Write any **two** ways in which bacteria are useful to human beings.

(i)

(ii)

(b) How do bacteria reproduce?

(c) State any **one** similarity between bacteria and fungi.

49. ***The list below is of a feeding relationship among organisms. Use it to answer questions (a) to (c)***

A dog Rabbit Cabbage plant

(a) Name the primary consumer in the above food chain.

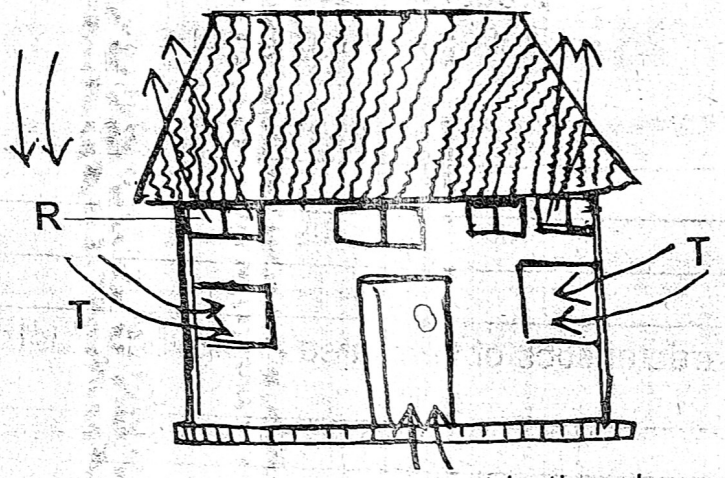

(b) Draw the arrows to show the flow of energy.

(c) State the importance of the following in the food chain

(i) plants.

(ii) bacteria.

50. ***The diagram below shows the movement of air in a living house. Use it to answer questions that follow.***

(a) What do the arrows represent in the above house?

(b) Name the type of air represented by the arrows marked T.

(c) Why are the structures R fixed slightly above the windows and door?

(d) State the importance of constructing a house with damp proof course.

51. (a) Give any **two** breeds of sheep reared for wool production.

(i)

(ii)

(b) Apart from wool, give other reason for rearing sheep.

(c) State the importance of hoof trimming in sheep.

52. (a) Write **two** uses of wood fuel to human beings.

(i)

(ii)

(b) Apart from the use of clay made stoves, give **any** other way of conserving wood fuel.

(c) Why do clay made stoves use less charcoal than metallic stoves?

53. ***Match the items in list A with those in list B correctly.***

A		B
(i)	Stomach	filters blood.
(ii)	Platelets	excretes carbon dioxide.
(iii)	Cortex	produces gastric juice.
(iv)	Lungs	clots blood incase of cut.

(i) Stomach

(ii) Platelets

(iii) Cortex

(iv) Lungs

54. (a) Give **two** characteristics of ventilated improved pit latrines.

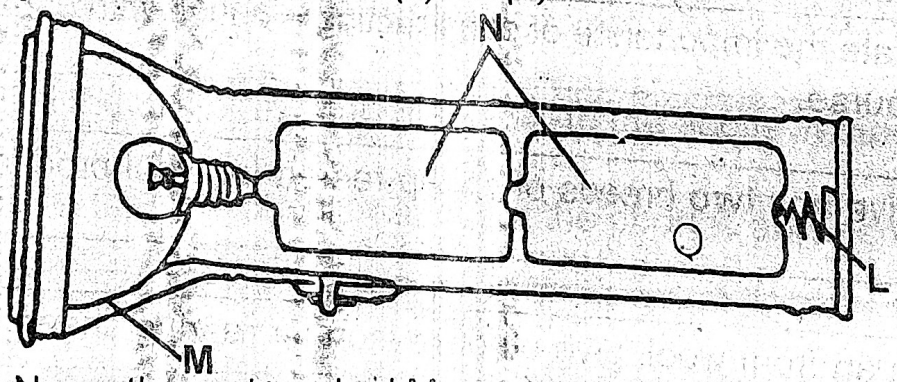

(i)

(ii)

(b) Write any **one** practice done to reduce bad smell in an ordinary pit latrine.

(c) State the importance of proper management of human wastes.

55. ***The diagram below is of a torch. Use it to answer questions as shown (a) to (d).***

(a) Name the part marked M.

(b) State the function of the part marked L.

(c) How can a person increase the brightness of light in the bulb above?

(d) What type of beam is produced by the above torch?
